

## EKOSEP® PMU Series Automatic Polymer Make-up Unit

EKOSEP® PMU automatic polymer make-up unit was designed for continuous batch operations. Dry polymer powder is fed automatically by a screw feeder. Clog-free polymer solution (from 0.05% to 0.5%) is guaranteed by a dispersion head.

## PMU Advantages:

- Optimal ageing time based on controlled batch principle
- Automatic, remote or local control options available
- Continuous batch operation
- Easy selection of different solution concentration
- Easily adapted for special requirement
- Special volume dimension available
- Standard volume from 0.5 to 10 m<sup>3</sup>/h
- Optional vacuum conveyor
- Optional dilutor
- Stainless steel construction
- Low maintenance cost
- Low operational cost
